VALORANT Weekly Mission XP Progress

[1] This cell contains a Google Analytics function that monitors the number of people opening the page.

Feel free to delete, it won't affect your use of the tool!

[2] Your Level should be the level you are currently working through, which will be highlighted in-game with a progress bar underneath.

[3] This calculation calculates how early/late you will finish the BP, assuming you continue at the same pace.

Riot has noted that Weekly missions do NOT expire and will also scale up every week.

[4] Please note that this data is currently being extrapolated based on Act 1's increase of 4050 XP per week, and datamined info on the Week's 1-5 XP amounts.

Will continue to monitor and adjust as we progress through the Act!

[5] Incremental XP (Remaining) is the full amount of bonus XP that you still have left to receive from the Weekly Mission XP increase.
