

ATTENTION: As of 11/23/2014 Industrial Pursuits has championed arrangements with HUSARIA to improve FC-3YI station reprocessing yield base from 54% to 57% by providing Pedestal Upgrade Platform & Minmatar Outpost Refinery Platform with all the required materials, totalling approximately 15Bill isk in costs. Any donations of isk or materials would be welcome.

I respectfully request you read the FAQ (Sheet 2 at the bottom).

Also see the donation records tab in recognition of those with Provi Spirit. (Sheet 3 of course)

Comments has been enabled on this spreadsheet, please keep it relevant and constructive. Feel free to Eve-mail Zevix or join our public channel "Z-IP Public" linked in my bio and corp description.

NOTE: Any materials whos goals have been met will still be welcomed and used for sale or trade for any materials or isk goals not yet achieved.

NOTE 2: Same for any donations of materials not listed

Completed on 01/09/2015

| F. | A. | Q. | | | | | | |
|-----------|-----------|--|--|--|--|--|--|--|
| Q | | Who the hell are you? | | | | | | |
| A | | I am Zevix, CEO of Industrial Pursuits, and Industrious local resident of Providence | | | | | | |
| Q | | Why are you spamming this project all over the place and why should I care? | | | | | | |
| A | | Because my corp is still essentially a 1 man corp, I have 2 accounts that make up a booster and a miner with a couple PI toons, the rest are PVP pilots inactive indy alts. And thus, alone, this project would take me nearly a year to do on my own...I need help | | | | | | |
| Q | | Why are YOU the one doing this? Why isnt HUSARIA doing this? | | | | | | |
| A | | HUSARIA are a PVP corp and so their resources and projects arent geared towards the many local industrialists needs. They chose to turn down all requests for upgrades for their own reasons which are well within their rights to do so | | | | | | |
| Q | | Are you just scamming me? | | | | | | |
| A | | No, I am not. If youd like to independantly confirm this arrangement with HUSARIA I welcome this | | | | | | |
| Q | | So what are you getting out of all of this, big fat paycheck or something? | | | | | | |
| A | | Actually....no. My agreement with HUSARIA included only 3 minor items, 1: I get to rent one of their few available office slots and pay 50mill a month for it, 2: That I dont have to pay 40mill in POS rent for all my POS's in their systems I currently pay, and 3rd: I get corp level +5 standings with HUSARIA (which will not effect docking fee's, taxes, or reprocessing yield since their services go off of Alliance level standings which I do not and will not have) | | | | | | |
| Q | | Okay, lets say "for the sake of arguement" that this is all legit....DEAR GOD MAN, WHY? Why do so much for so little? | | | | | | |
| A | | Because I believe in Providence. And Im not a PvP'er, so Im doing what I can the only way I know how to make life better for my beloved local residents and for the Coalition at large who fight every day to keep my Carebear ass safe and able to make a proper life out here | | | | | | |
| Q | | Many of have been stating or asking me in more detail why they should care about this project. This all seems to boil down to how it effects them directly, whether they are just nuetral pilots in other areas of Provi or even some of the big corps and alliances, Ive gotten a lot of feedback regarding how if it doesnt help them "now" why should I help... | | | | | | |
| A | | The simple answer I provide is: Why not? Okay, I get how that probably doesnt work for many, so I will elaborate. Im not asking for massive amounts of anything from anyone, if you give me a single isk or a single trit I would still be grateful, and I dont even care where in Provi it is cause I will come get that single trit. Really the BIG answer to this question is: Because it DOES help you, it helps EVERYONE. That is the great thing about Provi, much like our collective fleets can turn back the tide of tyranny from the 90% of the galaxy which hates us, we can also collectively bolster our region by placing more outposts and upgrading them all together so we all have access to more resources, better resources, for less cost, available faster, which in turn means more goods available to us all for less isk more readily. This project means those near FC can get more yield, produce more ships and mods, have a greater supply, which means lower prices more often. Im not just doing this for myself, Im am doing this for Provi, and you should to. | | | | | | |
