Hope SMOTO have enough liquidity, cuz Im ready to ape in the Smokin' token

Let's get the word out everyone, SMOTO is the next big thing making cannabis widespread, now meeting it on DeFi

So wait, this is the cannabis and CBD culture token? Guess it's better this way as it allows us to support cannabis in crypto

One day cannabis will be legalised everywhere meanwhile I'm buying SMOTO now

Good work by the Smokin' token team for bringing cannabis into the cryptoworld

Not so much cannabis stuff around the crypto, I just found the SMOTO launching soon

Yet again, this goes on to showcase the serious lack of cannabis and smoking adoption, we need more projects like Smokin' token, it's not about the crypto only

Wait a minute - so Smokin' token supports the cannabis adoption? Holy damn! I'm onboarded

Been looking into SMOTO for a while now and seeing it pop up in Twitter feed regularly

For those with TLDR syndrome: as for me, Smokin' token does two things - supporting cannabis legalization and providing an opportunity of yield farming for holders

Consider me not as a cannabis fan only, officially I will become a holder of smoking token in a few days, SMOTO seems interesting

Welp looks SMOTO has a trending idea behind it. Supporting and legalization cannabis via crypto could bring a lot of results for the community

Extraordinary to see cannabis tokens around the crypto, super stoked to see the SMOTO finally taking off

Waiting for the Smokin' token SMOTO AMA next week, need some more info to consider is it worth to ape

Okay okay, cannabis legalization is a deal! But how do SMOTO will support it?

Well, Dessertswap has audited Smokin' token, it makes me much more confident before the presale as a cannabis adopter

Smokin' token is launching soon, so I take this as a serious signal of community awareness about the cannabis legalization problem

Where's SMOTO will be listed? For sure, the cannabis community will support it

CBD and Marijuana is not about the problem, it's about the social benefit, finally it comes to the crypto, and SMOTO is launching

Super nice that cannabis community comes to the cryptoworld, Smokin' token is about the idea

Community driven projects are trending now, waiting for the Smokin' token presale. Meanwhile, what community driven projects are you taking part, guys?

This beats me, can someone explain for small brain here? Smokin' token will support CBD and Marijuana adoption and legalization, right? It's needed nowadays...

Smokin' token is something I'd have never thought above. Guys are doing a paradigm shift here.

Well done, cannabis and marijuana is finally coming to the crypto via SMOTO

The next pancakeswap listing I'm waiting for is SMOTO, Smokin' token is something really new

Cannabis changed my life for the better one, now it's time to change the crypto with the help of the Smokin' token

Cannabis adoption and awareness is the top priority for 2022 in my country, was funny to stacked on the Smokin' token today in my feed haha

When's will cannabis be legalized allover the world? Guys from Smokin' token have a lot of work to be done...

Looks like the SMOTO train is leaving the station now. Choo Choo all the way to the CBD and cannabis adopters

Can't wait to see the Smokin' token live on dex. Saying I'm excited would honestly be an understatement.

You're setting new industry standards bringing cannabis thread to the crypto, SMOTO team! Further = more

So, Smokin' token is what next-gen DeFi implementations look like, cannabis support and mass adoption will explode in 2022

I'm finally early on something. If everything is successful, CBD and cannabis benefits will change the DeFi space forever with the help of SMOTO and the team

Team, please do your best to take things slow and really create a huge impact on the cannabis world once the Smokin' token goes live

When is the Smokin' token launch scheduled for? Seems it's the first crypto token with the main goal to support the cannabis worldwide community

Community tokens are not about profit only, Smokin' token community is trying to bring the world adoption to cannabis and that's so ambitious goal!

Excited to see cannabis finally being recognized by the cryptoworld for what it is - a Smokin' token launching so soon

Cannabis turning heads all around the world and crypto is not an exclusion as I got by the SMOTO idea

You better keep your eyes on Smokin' token if you support the global cannabis adoption

Smokin' token SMOTO sounds interesting because they are currently

11% of rewards redistribution, is it ok or not for the smoking token community? IMAO it's a good way of supporting the growing ecosystem

Good to see you taking note of the Smokin' token, will see how it will move after the launch

I'm bullish as well on the current market and such projects like Smokin' token make me confident that crypto still can change the world

Excited about the upcoming launch of SMOTO as well, what's your opinion about it?

What's interesting around? A Smokin' token is that what I found and thinking of last days...

it's hard to conceptualize at first, no doubt it. Though after taking a good look at the website, soon people will have a better understanding about the Smokin' token

To my understanding, that's the case, not a regular shitcoin. SMOTO worth to DYOR

Being community driven Smokin' token will impact the cannabis community from the new side IMAO

A new yield-generating token named SMOTO is about cannabis and CBD. BSC community needs more projects solving real problems of our society

I've never thought before I would be able to support cannabis adoption anonymously via Smokin' token named SMOTO
