Project	Description -need more nuance between instructor role and course	Proposed by	March 3	Owner	Roadmap ticket	General area of investment	Priority	Status	documentation	Status notes	Status owner	
	author role -need to duplicate and reuse groups of permission settings'											
more nuanced admin controls / fine-grained roles	-more customization of dashboard	WGU	Arizona	Bryan/Lacee/Nacho	https://github.com/openedx/platform-roadmap/issu	administrative functionality	high - canvas parity	not started				
	the current completion funcionality imposes the way of determining if a learner has completed a unit: they need to have completed every											
	completed with a fixed logic (for example, having the content for 5 seconds on the screen for html											
	components). The ability for course creators to configure the completion criteria per each											
configurable completion tracking/completion api	component and unit would improve the real value of this information for both learners and instructors.	edunext	spanish	Nacho	https://github.com/openedx/platform-roadmap/issu	authoring - UX workflows		in discovery	https://openedx.at	atomic learning u	unit/modular learni	ng user stories
	enable students to be members of multiple groups in a course simultaneously; enable teachers to be											
	assigned to some groups but not all groups; share material exclusively with some groups; create											
flexible grouping options	forums for some groups; flexible assignment capacity to some groups	Spanish Consortium	spanish	Nacho	https://github.com/openedx/platform-roadmap/issu	configuration	high - canvas parity	not started				
	if the student is given more than one attempt, the faculty will be able to select whether to save the											
flexibility in grading questions with multiple attempts	highest score, the last or an average	Spanish Consortium Spanish Consortium	spanish spanish	Nacho Nacho	https://github.com/openedx/platform-roadmap/issu https://github.com/openedx/platform-roadmap/issu			not started not started				
expansion of weighted grading functionality expansion of rubrics	enable equal weighting by pairs and by course team expand ORA rubrics to include evaluation ranges	Spanish Consortium	spanish	Nacho	https://github.com/openedx/platform-roadmap/issu	configuration		not started				
	instructors can set a late delivery fate for graded sections that students will not see, and exams											
hidden late delivery dates	submitted after the date will be marked as "late" scores for each section are averaged across all grades received	Spanish Consortium	spanish	Nacho	https://github.com/openedx/platform-roadmap/issu	es/258		not started				
expansion of scoring functionality	received students can work together on an assignment that will be graded	Spanish Consortium	spanish	Nacho	https://github.com/openedx/platform-roadmap/issu			not started				
group projects		ASU/MoE	spanish	Nacho	https://github.com/openedx/platform-roadmap/issu	configuration		not started				
	progress. This will involve a mechanism that uploads real-time event data from logs and grades into a data- lake optimized for processing big data, and that is updated in real-time.											
real-time tracking	updated in real-time.	Spanish Consortium; WGL	spanish	Nacho/Brian		data	high - Spanish priority					
aggregated statistics predictive analytics	ability to jointly analyze multiple courses	Spanish Consortium Spanish Consortium	spanish spanish	Nacho/Brian Nacho/Brian		data data	high - Spanish priority high - Spanish priority					
	dashboards that allow the teacher to track performance of students Teachers will have views on: student											
real-time tracking panel, instructor view	progress, downoad of materials, and access	Spanish Consortium	spanish	Nacho/Brian	https://github.com/openedx/platform-roadmap/issu	data						
	dashboards that allow students to track their progress as well as compare their progress of the aggregrate performance of hite group.											
real-time tracking panel, learner view	three views: 1) aggregated data across courses with	Spanish Consortium	spanish	Nacho/Brian	https://github.com/openedx/platform-roadmap/issu	uata						
aggregated statistics panel	three views: 1) aggregated data across courses with tools for filter for startlend dates; 2) visualizations to drill down into dempgraphics, time evolution, and course comparison data; 3) general date filters	Spanish Consortium	spanish	Nacho/Brian	https://oithub.com/openedx/platform-roadmap/lssu	data						
	comparison data; 3) general date litters		-promoted	create specs with OC and								
graded discussions	condition that requires contributing a minimum number of posts in order to complete the course	Spanish Consortium/ASU		Elizabeth - also check with Aamir	https://github.com/openedx/cs_comments_service				n https://help.yellow			
Turnitin integration	check for plagiarism on ORA assessments create a new file management system that can be integrated directly into the Open edX LMS on an optional	Spanish Consortium	spanish	Nacho	https://github.com/openedx/platform-roadmap/issu	reasure/functionality		not started		wurd de accomp	lished via 3rd part	y integration
	basis for instructors (for example, as an option in the top											
	menu). This resource management module should work like the file management systems of platforms such as Moodle and Sakai, allowing you to upload files and links,											
	Moodle and Sakai, allowing you to upload files and links, change the name presented to users, activate and deactivate the visibility for students of a file or link and											
	deactivate the visibility for students of a file or link and set start and end dates for viewing a resource by students. It should also support the creation of a folder structure to organize resources and provide positions for											
improvements to file management	sorting and filtering resources by different fields	Spanish Consortium	spanish	Bryan/Brad/Nacho	https://github.com/openedx/platform-roadmap/issu	feature/functionality		not started		could be accomp	lished via 3rd part	ty integration
ORA peer grading	allow instructors to obtain deeper information about which students are in which phase of the peer grading process	Spanish Consortium	spanish	Nacho	https://github.com/openedx/platform-roadmap/issu	feature/functionality		not started
