

Some explanation as to where things are and how things work

Requirements	Hidden MultiReq	Earnings	Expenses	Career Mode Route
Shows all information concerning unlocking jobs in Career Mode	Simplified version of Requirements	Shows the amount of money earned per job.	Contains the cost of new washers, nozzles and extensions as well as when they're unlocked.	Shows the route for Career Mode with notes as to what to buy when etc.
<p>- The left columns show how many stars in which job are needed to unlock that job. Some jobs have multiple requirements, all requirements have to be met to unlock that job.</p> <p>- The right columns show what that job can unlock, however some jobs won't be unlocked right away after reaching the listed amount of stars since these might have multiple requirements.</p> <p>- The levels with extra lines around them are key points, all jobs before that have to be 100% completed to be able to progress.</p>	<p>- This is the same concept as the Requirements page, except the multiple requirements and "Helps unlock" are left out to make things more clear. This is most likely all the knowledge required for progressing in a normal playthrough since a lot of requirements won't be noticeable unless you go out of your way.</p> <p>- Jobs related to the Tree House and Subway are however left in since it's possible you might want to wait to complete those until you have better equipment or for other reasons.</p>	<p>- The total shows the total amount earned, which consists of the details value and the completion bonus value. Completion bonus is only given when a level is 100% complete</p> <p>- Shows when new equipment is unlocked, the washers are star based unlocks so these may vary depending on the route. The Trident and Extra-Long Extensions are fixed points.</p>	<p>- It's probably best to not use cleaning liquids</p>	<p>- Information about cell colours is listed on the page itself.</p>

This is currently the most optimal route as far as I know.

The orange levels have to be completed in that exact order, often due to shop items being unlocked or able to be bought.

The green cells are recommended but not necessary per se, these will save you time but aren't game changing.

The red cells are absolutely necessary to follow, this will make you a lot of time otherwise.
