

High-Level Summary

Now that the Double-Dip Dual Destiny exploit has been fixed, chest farming in the landing is now the most efficient farm for exotic class items, assuming that you know the route and can do it efficiently. The exotic class item drop rate from chests seems to be somewhere between 2-3%. It does not seem to be affected by any factors such as overthrow level, normal chests vs high value target chests, or any other factors. It also does not seem to have bad luck protection, leaving the dual destiny mission as the only one with deterministic rewards, if you do not want to subject yourself to the RNG of chests. As far as my data goes, I do not know for certain if there is a "good luck protection" mechanic in place (i.e. a mechanic to prevent you from getting drops from chests all but every x amount of chests), as I never got two class items in one chest loop before, and neither did I ever get any back to back. I would need more data to definitively say either way on that front.

Average Time Between Class Item Drops	Smallest Time Between Class Item Drops	Longest Time Between Class Item Drops	Drop Rate	Total Chests Picked Up	Total Class Items Dropped	Longest Dry Streak (Chests)
0:13:24	0:05:10	0:42:10	2.41%	2615	63	118

General Information For The Farm
<p>The most efficient farm for chests is reloading The Landing over and over at an Overthrow Level 4, as it is the most compressed landing zone with the least locations where getting off of a steamer is necessary. When you first load into the zone, the chests will not have spawned yet. They take 20-30 seconds to spawn in, which is indicated by a blue flash on your screen indicating the chests have spawned. It is recommended to not move from the spawn location until chests have spawned to minimize backtracking.</p>
Chests
<p>Chest spawns are broken out into 5 "Groups" within The Landing. I've labelled these with a corresponding color on the map. Each Group has exactly 5 possible chest spawn locations per back-in and the game will choose exactly one at random each time you load in. This means that you will ALWAYS have exactly 5 chests to pick up each time you reload the zone, and if you know which chest spawn is part of which group, you can reduce the patting needed to get all chests in a run since you do not need to check other spawn locations in a grouping if you have already picked up a chest from that group. The recommended patting that works for the 5 other chests spawn, move south from spawn, check Group 5's southern most 2 chests, then proceed through Group 1, skip the edge of Group 4 and get the southernmost chest if it is there on the way, then move into Group 3, then Group 2, then the rest of Group 4 and finally hit Group 5 if neither of the two southern chests were picked up.</p>
<p>Video demonstrating all 5 chest locations for each of the 5 chest groups, as well as how to farm:</p>
