http://suissemania.ch/	Never finishes loading	Stuck at 72%	Yeah, takes too long to load. Do not want to sacrifice load time. Stopped at 72 also				
https://www.lahautesociete.com/	Now THIS is what I'm talking about!!! Love it!	Thats a sick website	Very cool and my fav of the list	v	can we use code modules to do this?		
http://www.catchthedragon.nl/#/catch	Not looking for this kind of interactivity. Doesnt allow showing content much	I agree with Greg	fun but just a display				
http://acme-experience.com/retail-and-trading	Can't get to page, (Error # 404 - Page not found)	404	same				
http://www.newstech.jp/	A bit busy, but I am in love with the concept of how high-tech it looks yet implements responsive design...	Cool design. Not seeing the 3D focus though	Agree it's too busy. Not liking it.				
http://www.innerspacevr.com/	Unless I'm missing the exciting parts, this is just a 2D page with links to projects...	I'm only seeing paralax scrolling	Yep- nothing fancy.				
http://kurokawawonderland.jp/	Only like one small piece of this: the dial as a way to move through content.	No 3D. Just a fancy scrubber	Yeah, homepage is interesting but not really a VR experience				
http://thunderdome.riotgames.com/teamwork	Can't get to page, (Error # 500 - Internal server error)	500	same				
http://www.alliwishyou.com/	Partially useful for concept of how to show content/sections if we do this in some 3D manner	Tile design. Not really seeing the 3D here	I like the way this could different capabilities.				
http://galeriekostek.cz/	Meh.... this is really more like a powepoint	Could be a cool effect to incorporate	Could be cool with the Leap but still not loving it.				
https://www.greenwoodcampbell.com/	If we replace the 360 video with a 3D room, the "highlightable" items would be a neat way of navigating the site	I like that idea, Greg	ok				
http://www.ro.me/	This is more of a game but a damn good effort	Yeah awesome to see the power	fun				
http://cabbibo.com/	Sort of our gold stardard right now	Yeah I like it	Yeah, this is what I imagined				
https://webvr.info/samples/08-dynamic-resolution.html	Pure WebVR - nothing we can't do without A-Frame...	Agree	?
