

STATE TOTAL EFFECT COMPANY SWITCHED DELETED VOTES SWITCHED DOUBLE TOTAL EFFECT

ALPHAOMEGAENERGY.COM

AlphaOmegaEnergy is the World's #1 Breakthrough CleanEnergy Technology Startup With Over 4,838 New Technologies Professional Investors are welcome (i.e. others) to contact us as we are headed to RegCF Crowd-funding soon & seeking Angel Investors

Please Try to credit us for this work & awareness as we are an unsupported Startup doing Social Enterprise for Impact in the Emerging Markets & don't have access to investors from here. (we did not do the original forensic data collection, nor the queries for the changes, we are just reporting this to you. We did work on this spreadsheet to simplify & calculate though)

Investors Can also Follow us on AlphaOmega on twitter which is only for ADE related material in general.

MEWE: AlphaOmegaEnergy

If anyone would like to Contribute Video, Graphics, Marketing or Sales help to our Startup, You can earn Shares & Deferred Payment! Ask us on Twitter: ADECOM

You can download this I think from Gdrive, it may be better quality than the one on twitter.

A Full Investigation into every part of the Voting Data MUST BE COMPLETED by Law Enforcement Agencies. This is Systemic. Investigators by all Countries and ALL Elections previously conducted by these companies MUST ALSO BE DONE REGARDLESS they are over!

THERE ARE MILLIONS MORE VOTES WHICH WERE STOLEN FROM TRUMP IN ADDITION TO THESE, IN MANY WAYS. THIS DOES NOT INCLUDE MANUAL ENTRIES FOR BIDEN

- Quad voters 1.8 Million were always on the lists
-Double ballots for Maiden & Married names were sent out & names for those recently divorced etc
-People who voted 2, 10x
-Manual entries of votes by the administrators
-Manually changing votes totals into the machines
-Manually entering false votes into the machines where there is not a switch or a delete of Trump votes
-Ballots with only Biden not down ticket
-Ballots manually changed to Biden (BID) will be HUUUUUGE!

The Databases in the excel file were also overwritten at some stages according to some investigators, hiding that Trump actually had way more votes in the previous file. Replaced with one that makes it look like Biden got more all along the whole way.

Table with columns: State, Total Effect, Company, Switched, Deleted Votes, Switched Double, Total Effect. Lists states from Pennsylvania to Vermont with corresponding vote counts.

SOME OF THAT FROGGY BACON -> SWOOP FROGGY

Summary - Index Category Leaks, Dumps and Breaches (1 - 100 out of 2237 results)

Search results for domain 'dominionvoting.com' showing various email addresses like phil.foster@dominionvoting.com, jack.blaine@dominionvoting.com, etc.

NOTE: Deleted votes are votes that disappeared, not only for Trump, but overall.

Here is the Data: https://www.usatoday.com/story/news/election/2020/11/03/what-page-honors-president/5600000001/
This link is to the specific part when the switch happened: https://www.usatoday.com/story/news/election/2020/11/03/what-page-honors-president/5600000001/

You can see in that picture, that Trump lost 209 votes. Those all went to Biden. BUT, Trump also lost 2,324 votes, that went nowhere.

SOURCES: Here is the data I used: https://www.usatoday.com/story/news/election/2020/11/03/what-page-honors-president/5600000001/

The data is from Edison Research, it is used for election coverage by at least ABC News, CBS News, CNN and NBC News. It is also used for the website of the NYT, and probably others as well.

I removed the data from the NYT website, from https://www.usatoday.com/story/news/election/2020/11/03/what-page-honors-president/5600000001/ to check for other "leaks" or "leakage" in the link with the state you want to check. The states that have spaces in their names, like New York, write new-york instead.

It's like this:
Nr: 187 : 2,984,468 (Total votes) - 0.566 (Trump share of the votes) = 1,689,208,888
Nr: 188 : 2,984,522 (0.56 = 1,671,332,32)

Do the same thing for Biden, and you'll find that he gained the votes that Trump lost. I made a program that basically checks every single change in votes, does the above to check if votes were switched, then adds them all up to get the total amount of switched votes.

Here is the link to a zip file containing all the excel files for the states, and the spreadsheet file, you'll need to download it with a zip file, to check if you want to check the file for one specifically, it named them by example.
