Comments
Diamond Hands Rating = How well the investors hold. Low rating = dumpers
You probably shouldn't add Flippers tiers to your deals unless you're a flipper yourself
Those with less than or equal to 2 on Diamond Hands = Flippers
Tier Chad = 28-30, Tier 1 = 26-27, Tier 1.5 = 25, Tier 2 = 23-24, Tier 2.5 = 22, Tier 3 = 16-21, Tier 4 = 11-15, Blacklist = 0-10
Value-add is based off of involvement, support, resources, marketing power, etc
BrandName is based on recognizability and brand within crypto. If branding is negative due to recent events, this will affect score.

Name	Tech/Infra (1-10)	Value-add (1-10)	Brand/Credibility (1-10)	Score	Tier	Comments
Wintermute	9	9	9	27	Chad	MMs were trickier to rate because there is less public information
Selini	9	10	8	27	Chad	Opinions from a lot of reputable founders and top investors were gathered to come up with ratings
Manifold Trading	9	10	8	27	Chad	
Tower Research	10	6	10	26	1	Tech/Infra refers to the firm's actual algo/systematic trading abilities
Cumberland	9	7	10	26	1	Firms that are known for subpar execution score less here
QCP	9	8	9	26	1	
Jump	10	6	10	26	1	Value-add is based on whether the MM actually engages with the project
HRT	10	6	10	26	1	For example, MMs that have 300+ projects can't give each project much attention and value, and therefore have lower value-add
Jane Street	10	6	9	25	1	
Flow Traders	9	7	9	25	1	Brand/credibility comes down to strength of brand and being trustworthy (doing what they promise they will do)
OMS	8	8	9	25	1	MMs that never meet KPIs and/or are notorious for manipulation score badly here
SIG	10	6	9	25	1	
Amber	8	7	9	24	1.5	Note that the ratings are mostly for token market making, which means some MMs are now inactive
Keyrock	8	8	8	24	1.5
