

Year	Premier League	FA Cup	League Cup	FA Cup Runner-up	League Cup Runner-up	How Competitive Are The English Domestic Competitions - An Analysis				
2010	Chelsea	Chelsea	Man Utd	Portsmouth	Aston Villa					
2011	Man Utd	Man City	Birmingham City	Stoke City	Arsenal					
2012	Man City	Chelsea	Liverpool	Liverpool	Cardiff City					
2013	Man Utd	Wigan Athletic	Swansea City	Man City	Bradford City					
2014	Man City	Arsenal	Man City	Hull City	Sunderland					
2015	Chelsea	Arsenal	Chelsea	Aston Villa	Tottenham Hotspur					
2016	Leicester City	Man Utd	Man City	Crystal Palace	Liverpool					
2017	Chelsea	Arsenal	Man Utd	Chelsea	Southampton					
2018	Man City	Chelsea	Man City	Man Utd	Arsenal					
2019	Man City	Man City	Man City	Watford	Chelsea					
2020	Liverpool	Arsenal	Man City	Chelsea	Aston Villa					
2021	Man City	Leicester City	Man City	Chelsea	Tottenham Hotspur					
2022	Man City	Liverpool	Liverpool	Chelsea	Chelsea					
2023	Man City	Man City	Man Utd	Man Utd	Newcastle Utd					
2024	Man City	Man Utd	Liverpool	Man City	Chelsea					
Big 5 win %	93%	87%	87%	60%	40%					
Total chance of big 5 winning a trophy --->			89%							
Total chance of big 5 being runner up in cup --->			50%							
Total chance a final will be between 2 of the big 5 --->			68%							
Total chance of anyone else winning any trophy --->			11%							
When you divide that 11% up by the remaining 15 teams in PL, each teams % chance of winning a trophy --->				0.73%						
So basically, if you're PL club fan in the modern game, you're going into the season with a 0.73% of winning anything domestically And barring Leicester's 2 titles, in the past 10 years it's basically closer to 0% than 1%
