Thoughts: Very early so the sound is very experimental and also kinda boring imo lolol. Probably my most personal like . music . you can hear my VOICE in it!!! which is rare. I dont hate this album as much as I say sometimes but like I still dont like it much. esp the last song my heart was in the right place but ion think i was ready to make music like that yet.	Thoughts: FUCK MY PAST SELF DUDE OH MY GOD IF I DIDNT SAMPLE SOOOOO MUCH BOH THIS WOULD BE LIKE 40X BETTER IN MY EYES . it kinda works overall though. first and last track mog . i think this album has like amazing atmosphere n such and is my best ALBUM. (epic hint). i like 70% pulled off what i wanted to with this. last song is one of the best things ive made. also most of my friends say its the best so take that as you will	Thoughts: I made this in one day for kit's netlabel. took me liek 4 hours and isnt very good!! but ppl seem 2 think its cool. its one of like the last penny projects u would wanna listen 2 but if u enjoyed soufulnessness and want it but like odd futuristic experimental bullshit then its here!	Thoughts: lol	Thoughts: MY BEST WORK! HOLY SHIT! perfect atmosphere, sounds good, and doent overstay its welcome. truly a musical journey ! also just look at those genres!!!! yummy! this is my only album where i like will actually listen to it cuz it just . sounds good! i love it!! listen to it plsss	Thoughts: this is shit lol	Yeah this is like . My fav ALBUM. [unclear] is still like perfect in my eyes lol. Anyways so far eric likes it sooo thats a good sign!!! overall im just happy its done since it took me a good while lol. I hope other ppl enjoy too!! I think the soundscape of soufulnessness still kinda carries soo it might still be "my best" but i love this one!

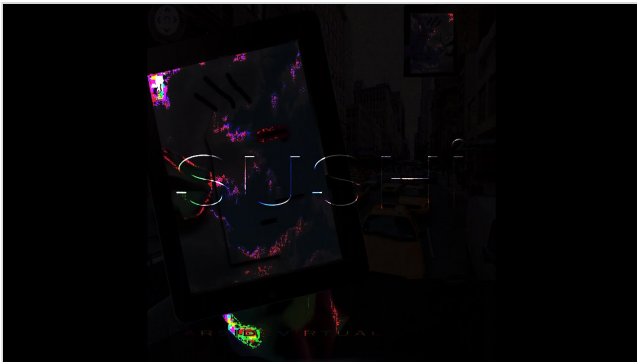

ill do this later

Worth Listening: not rly	<b>Worth Listening: yes</b>	Worth Listening: not rly	<b>Worth Listening: yes</b>	Worth Listening: if u like the others!	<b>Worth Listening: probably</b>
ehh not that intersting cus it was made in FL!! but it has its moments and isnt too long	very early ableton testing out sound deign stuffs. actually pretty cool and quite short soo you wont wanna die if you listen	does some interesting sound stuff but too repetative and long to really be worth listening	def an example on like my modern sound when it comes to just making something sound COOL not just music.	METRO!	some cool stuff in here i think. really repetative like any other ixstay album but ykyk u gotta stuff
btw keep in mind "worth listening" is still like . EHHH. like it isnt gonna be good like dont expect tht lol

funniest thing ive made i think	play on erics "the big". concept is cool but you cant really listen to it lol	i mean. the title says it all. there are good songs here but like. i didnt make them (for the most part). and its just LONG lol. but i mean it wont be the worst thing u will ever hear (probably)	random idea i had at like 4am yesterday. made it. its fuckin epic sauce

**Adventures in Green Foot Printing /  
Jet Skis & Sushi**

first dabble into like visual art stuffs . !!!! and it worked,  
this is a cool style to go for and i might make a few  
more videos doing it ! the sushi half is especially  
cool . i think i cooked hard with that! fits the vibe  
of the song well and overall just works! ya!

add yung nasdaq, goyslop adventures, and three musketeers
