| Category | Weighting factors (WF 1-6) | Category descriptions |
|---------------------|----------------------------|--|
| Early game strength | 2.5 | How powerful are the civ's abilities in the early game (i.e. can they get you off the ground to a good start, early boosts that start the snowball) |
| Late game strength | 1.5 | How powerful can the civ be when they are fully online in the late game (how well do their abilities scale for good districts, stats, combat strength, city count, etc.) |
| Versatility | 1 | Are the civ's abilities useful under multiple conditions (high score) or do they put the civ on rails (low score) |
| Dependencies | 2 | How dependent is the civ on external forces (map, spawn, pantheon, religion, etc.). Low score = very dependent |
| Synergy | 1 | How well do the civ's abilities work with each other |
| Strength of focus | 2 | How strong is the civ at their presumed focus |

Total = 10

Formula TOTAL = WF1*EGS + WF2*LGS + WF3*versatility + WF4*dependencies + WF5*synergy + WF6*SOF
