| Do you remember a cituation when you get stuck with your research and wis | hed there was an online tool that could help you continue? If yes, could you describe the thoughts that you had in | |
|---|---|--|
| this situation? | ned there was an online tool that could neep you continue r in yes, could you describe the moughts that you had in s survey. We decided to make them public to allow potential tool developers to get insights into our survey respondents' | |
| ideas. The fact that we share those tool wishes does not mean that Bellingcat think | s arrey, we decide to make their public to allow potential tool developers to get insigns into our survey responsents s those ideas are necessarily good ideas, technically feasible or that they are useful for the open source investigator suggested by only one person and are not a representative overview of tool needs amongst open source investigators. If | |
| would like to build tools based on those ideas, we suggest to check with a larger nu | suggested by only one person and are not a representative overview of too needs amongst open source investigators. If imber of investigators whether they also see a need for such a tool. | |
| Search engines | | |
| | I wanted to compare search results of multiple search engines at the same time and couldn't find a tool that could do it well. I spent ages looking online for a solution and ended up wasting the time I could have just used to do it manually which was very furstrating/Have you thought about an aggregator tool? In the beginning of the internet, for me that is | |
| A tool to compare/combine search results of multiple search engines | early, mit-90s, when there were different search engines and not only google or bing (for the western world) I used Metacrawler, the search engine aggregator a lot to have better results. An aide to finding the best search terms is key. Google or equivalent spitting out a million results is pointless. Interactive | |
| A tool that helps find the right search terms | real-time changeleffect of different search terms would be good (or multiple simultaneous searches to see what works best)./Ability to 'ask' the right relevant question to obtain data. | |
| Search engines that allow to input questions | For this use-case I'd love a search machine that finds real answers which are on-topic and relevant to the question i research. Google, Bing, DuckDuckGo [*] , etc. just haven't worked out how to do this yet | |
| A free web app that pulls down all articles, videos, images for a specific topic | There and its coogle, bing, buckbucks, etc. just haven two kee durnow to do inits yet. There needs to be a free app like web crawler or Google that can pull down all articles, posts, videos, images etc on a given topic. | |
| Username/Name Searches | given topic. | |
| A tool that suggests different ways of spelling a name | Suggestions on names writing wrong (ex. Katty, Keit, Kity, Kathy) | |
| A tool that helps differentiate between several people with the same name | I was attempting to validate an identity of a foreign citizen and there were multiple people with the same name in the same organization. I needed something to illuminate the publicly available information so I could discriminate between the three people and correlate them to other records. | |
| | Username archives. Pseudoryme now, but historically registered / used variation of name, initials or other PII centreability to easily puil a log of historical usernames on each account, and pull similar usernames from all corners of the web(s) for linkagal with it was easier to track various things like usernames, phone numbers, etc over time. Seeing now is fairly easy, but seeing sometiming in a context of e.gs. 5 years ango is more difficult and often unreliable even when | |
| A way to search for historical usernames Something that helps with searching for names | now is lainy easy, but seeing something in a context or, say, 5 years ago is more dimicult and otten dimenable even when possible. | |
| A tool to find private information about a person | How could I find private or concealed information about a person in web? | |
| Social media/messenger services | | |
| A tool that helps go through Instagram content | I often think "I don't have the extra hours to spend on A or B" when A or B is scrolling through rows of Instagram pictures with certain hashtag/location which cannot be ordered by date. Perhaps a fast-automatic scroll-down web extension? | |
| A tool that helps find a name in an Instagram follower list | Sometimes I wish I had a tool to directly search for a name in the Instagram follower list rather than scrolling for a lot of time | |
| A tool that helps researching private social media accounts | I'm continually frustrated with Instagram and other social media services with private profiles as it takes time to infiltrate them with undercover accounts. | |
| A reliable scraper for social media platforms A tool that shows of which Telegram channels someone is a member | A way to find what Telegram channels someone belonged to would have been good. | |
| A tool to monitor Telegram channels | Telegram monitoring is a pain in the a**. No working solution for automated channel monitorings and mapping. Everything has to be build/implementend by one self, what is time consuming and often not possible due to lack of capacities. | |
| A tool to help find the digital footprint of a person based on existing pieces of | Automating the process of finding people in social networks (when you know phone number, email address or other personal data) or finding their digital footprints on the Internet./locating an association between an email address and the | |
| information | existence of a twitter account. Facebook groups - wish there was an efficient way to get more out of it, as in members, where they're from, etc. | |
| | Facebook page - enumeration of likes and such with location based services, as in the locality / region, to get ideas about where what particular topic is relevant. Scientishing to enable extraction of complex data real liter and at scale from Facebook, especially private groups ⁷⁷ /inding people using facebook is spent extra by the partier data from rulpips different locations. The science of the science | |
| A tool to get data from and analyze Facebook | frustrating the lack of comprehensive 'search-within-X-wall' or 'search-within-all-my-friends-walls' service in FB Finding old Twitter photos that were deleted but still come up on Google, but the image quality is very had. Wish there | |
| A tool to retrieve deleted Twitter photos via Google | Finding old Twitter photos that were deleted but still come up on Google, but the image quality is very bad. Wish there was a tool that could recover those photos. | |
| | I found quite hard to find a map that aggregates geolocalized instagram stores or titolocy locure / video contents and /or other "low" social geological geological geological geological geological geological geological geological geolocalization metadata by default. Hence, I had to monitor on Tivitter and Telegaram but to navigate between mage/videos.icema Videos de great benefit. Searching or contents on instagram is every diffault. (I had a tool | |
| A tool that shows Instagram stories or TikTok posts etc. from a specific location A tool to research the spread of false information on Telegram | that could search and sort geotagged posts it would have helped me One of our challenges is the lack of a tool that would allow as to monitor false information spreading on Telegram. | |
| | I want a dashboard of tools with descriptions of use and videos to analyse tweets, linked in in and facebook /e.g. extract all employees profiles on Linkedin for a larget company (first name, last name, position etc.). Facebook search - manual search for comments, photos etc./>s, specially when social networks profiles are blocked or when you want to bok at someone's linnkedin and it shows how is looking into their profile. Lues sock puppets but they are time consuming to manage./finding information across a locial platforms would be nice | |
| A dashboard to research content from several social networks A tool to easily analyze Twitter data | Would like an easy way to analyse Twitter data. | |
| A reliable archive of social media profiles and posts | I have gotten stuck when social media profiles and / or posts have been deleted to cover their tracks. I really wish there were reliable archives of for example Twitter | |
| A tool that extracts text from followers of a specific Twitter account A possibility to map how specific (fake) stories are shared on WhatsApp. 1-click access to social media APIs rather than having to set up access like a dev. | Load all followers of particular hvitter account, with liked entries, and extract text from there to google it - it is time consuming and requires a lot of definit | |
| A way to scrape reviews on Glassdoor | I wanted to scrape the reviews on Glassdoor but they are only visible after login, and that simple manual step is a lot of coding work to automatize with either R or Python. I wish there was an R or Python function in Beautifulsoup for that | |
| A tool to find the source of spam accounts on social media | | |
| A Pattern-of-life analysis of gab and twitter users | | |
| Identify text on images | trying to identify/track people by text on clothing. Would be nice to have analysis to clear up photos to identify visible text, | |
| A tool that identifies text in online pictures | predictive analysis for obscured text, and search engine to find images/video based on text string /Ability to extract text from post of image, and run it frough something/in/image search engine capable of finding search terms/keywords written in images (like the Facebook search feature but for the wider web). | |
| Object recognition A tool to analyze social media posts for sentiment and object recognition | A tool that allowed to analyze social media posts for sentiment and object recognition (tanks, weapons, etc) would help | |
| A tool to analyze social media posts for sentiment and object recognition Object recognition for vehicles/landscapes | n toor that anowed to analyze social media posts for sentiment and object recognition (tanks, weapons, etc) would help | |
| An alternative to Google Lens for objects and locations | I wish there was a reliable alternative to Google Lens for specific, non-generalized inanimate objects and locations I wish there was a tool that could help me identify wound types in photos of military and civilian wounded or deceased in | |
| A tool to identify wound types | war. | |
| Facial recognition An open source facial recognition tool | | |
| A facial recognition tool that can be used together with other search tools | Many people finder/lookup and company/charity search tools are hidden behind subscription services and require an account sign-up. If these kinds of tools were bundled with face search tools, if appropriate, that might be useful. | |
| Text analysis | | |
| A tool to do a quick text analysis in forums | a text analysis pulling in comments from threadsforums. 1. To flag for increases in specific words tagged by the researcher 2. If part of the research requires engaging with an online community, being able to a quick analysis of common in-group terminology AND, especially for woment, to match language patterns that indicate gender. | |
| A tool that finds and analyzes similar online texts | An online tool that crawls the web for similarities and shows the linguistic features of a text to draw conclusions about/find the author. | |
| A text partser that finds text of similar style | I was totally stuck analyzing a text and wished there was a good text syllable/style/grammar parser that would find text consistent with the style in question. | |
| Video analysis | | |
| | During OSINT work I was unable to reach some video materials in better quality. Also, it would be great to have an online tool for detailed video analysis with all additional software such as transcription tools, language recognition, automated | |
| A comprehensive video analysis tool | reverse image search, etc. I can into protein swith video verification. I find at difficult that video is comparison a subjection of images. I find it hard to proof synthetic video other than with visual analyses. I find synthetic autio impossible to hardle, archiving my process and the info hard lused to come to decisions is difficult and takes us a doit firme, finding an original is a and the info hard lused to come to decisions is difficult and takes us a doit firme, finding an original is environments to and the info hard lused to come to decisions is difficult and takes us a doit firme, finding an original is environments to the subject of the sub | |
| A tool that helps verify videos | me. | |
| A tool to find out whether a video has been taken recently | Trying to see if video footage is relevant to the time, wanting to know if its historic footage or recently taken | |
| Network Analysis | I was looking for a tool to utilize CSV/JSON files to visualize connection between accounts on Twitter over time/ An online tool that could show you social media connections for all topics would be useful (but maybe illegal/unethical). A fee social network analysis tool would be averagement/A comprehense Fraebook tool for example, to may interactions/Sometimes I would like to be able to see human interactions better and its not usual to find a Social Network Analysis component in a pertrainly. Interactions/Sometimes I would be useful to the second seco | |
| A network analysis tool to analyze social media connections A tool that helps draw networks from data, eg a sociogram | | |
| A simple tool to visualize connections A tool to map relationships between companies | Visualizing connections in a "pinboard" kind of way without having to dive into advanced database visualization tools A method to diagram company interactions similar to social media tools that map account relationships. eq. Net/vic | |
| A corbined search and network visualization tool | A neutroo to bagrain company interactions similar to social media tools that may account reliationships. eg. veeliyito A tool that combines 12 with Yose, Maltego, UCINET and Gephi, but also has the ability to search for license plates and recognize human faces | |
| A collibried search and retwork visualization tool A tool to link social media accounts through followers | Linking social media accounts by followers/following was easy through Chrome plugins, but a lot of those systems are killed once the platform makes a change. | |
| the second second an origin on one (8 | | |

| | What: I've recently wished there was a user-friendly, aptly-linkable, visual/graphic (ideally interactive) reference tool that acutely identifies media sites known to deal in counterfactual information and visually maps relevant connections between | |
|--|---|--|
| | distinct outlets. | |
| | Why: Explaining connections between repeat counterfactual offenders a la carte is tedious for the writer and tedious for the reader. | |
| | Clicking this make-believe link would, in a perfect world, bring the reader to a visual page where Gateway Pundit and Project Veritas, for example, would be duly contextualized in a visually appealing manner. | |
| | In my imagination: The collapsed view: could show connections where different counterfactual media sites shared the same or similar iterations of a false or deceptive story. | |
| A tool that shows connections between websites | The expanded view: could be disinformation dossiers linked to original deceptions alongside concise and rigorous corresponding explainers. | |
| | I needed a tool that could connect words from newspapers and make a wordcloud with connection between things that | |
| A tool that shows connections between topics in texts | are related. Filtering both information and connecting topics./another great thing would be a graph database where certain terms could be linked if once mentioned together, e.g. in one twitter post or a journal article | |
| Visualization tools | | |
| | The time aspect of events is covered less than the geography. There are less tools that easily visualize, simultaneity and | |
| A tool to visualize timelines | time dimension. | |
| Distance calculations | | |
| | I had to use a very crude distances calculator to get an estimate on size etc. of an object visible in a picture. Wish I had a tool that immediately finds common objects within the image that could be automatically used for measurements | |
| A tool that identifies objects in pictures for measurements calculations | calculations, maybe even with estimations based on local vegetation. | |
| Geolocation/satellite imagery | | |
| | When I am working on a geolocalisation I never know if someone already did it or is working on. So I regularly wish for a | |
| | centralisation of works or a tools who search with keywords if someone already worked on the event. (similar to liveuamap or a search engine with OSINT investigations)/One problem I've seen is duplication of effort in OSINT work. | |
| | While I believe multiple independent researchers coming to the same conclusion (on, eg, a geolocation) is very important, it's also counter-productive when new content comes out and 10 independent researchers all frantically invest an hour | |
| | (some more or some less) solving the problem. This leads to (a) aggregate wasted effort [only 2-3 independent | |
| | researchers doing the work are needed for good independent verification: 8-10 might be overkill), and (b) missed opportunities (the other 7-8 researchers could have been looking at other problems). The tool that is needed is to facilitate better crowsbourcing/coordination within the OSINT community - a way of automating and managing both the collection | |
| | of the source data (e.g. raw unverified social media content) and the statuting in the single (e.g. "nobody has started researching this yet" or "@janeOSINT_23 and @joeResearcher_37 are researching this" or "@joeResearcher_37 | |
| | made some progress on this, but is stuck") so that researchers can make smart decisions about what they spend their | |
| A central place to coordinate ongoing geolocation/OSINT research efforts | time on | |
| A database with collections of specific features of a city | "I wish there was a compilation of types of street lights in every country" or a "compilation of bus stop designs in each country". Some sort of database of specific features of a city that would aid locating it | |
| A better source of altitude data that could be overlaid/integrated with a terrain | | |
| viewer like Google Earth Pro | I often use aerial images to help determine the type of activity performed at a given location. A tool that helps find all the | |
| A tool that helps find all available image related to a specific location | available related images including street views would accelerate my work. /3D-Modeling would be very helpful, also street | |
| A tool that helps find all available images related to a specific location | view, or other 360° pictures from some places, that have bad quality in satellite photos Would be interesting to see what future possibilities there are for AI image analysis, e.g. geolocation by reverse image | |
| An affordable Al image analysis tool | search/feature identification, solar data. I'm sure these are already featured in intelligence industry software but will be interesting to see if this can be made affordable / practical for OSINT community and journalistic use | |
| | I wished there was a tool that could geolocate the subject of social media posts from its content. So not just geotags but, | |
| A tool that helps geolocate social media posts | e.g. if it referenced an area nearby that I may not be aware of, then that post might be useful to me. I had wished that there was a tool that could allow me to import spatial data from Google Maps/Earth/etc. into a 3D | |
| | visualization at there was a tool nat could alow me to impose space data tool body employed an uncertaintee. The above visualization software like Blender so that I could navigate to specific points of perspective to get visuals sort of like Peak Visor. The second part to this would be to have support to be able to import a 2D image (photo or still from a video) into | |
| | Which the section plant to this would be to have support to be able to import a 2D image (photo or sum form a vice) much the software to be able to overlay and line it up with possible perspectives to check if they're spatially compatible. Perhaps components of these things are available somewhere, but I have not seen a ready-made, stand-alone tool that | |
| A tool that allows to import spatial data into a 3D visualization software | can request + package + import such data into some sort of an easy-to-use solution like a Blender plug-in with adjustable | |
| A tool that allows to import spatial data into a 3D visualization software | transparency (necessary for aligning the overlay of a 2D image). I've often wondered if there could be a collection of pre-analyzed satellite images of interest for potential flashpoints. It | |
| A collection of pre-analyzed satellite images | would be great to have some sort of a "curated" collection so those of us not formally trained in IMINT can have our homework checked, or at least not rely on a bad interretation. | |
| A collection of pre-analyzed satellite images | nomework checked, or at least not rely on a bad interpretation. | |
| Documents and OCR | | |
| A tool to compare financial statements | A tool for getting and comparing several financial statements with each other without the need for OCR, manual extraction and sorting into a spreadsheet. | |
| A tools that helps solve the challenge of working with documents in different format: | Tools that make gathering and sorting information more streamlined and workable than several different documents of different formats | |
| | There is no good way to OCR the documents (related to a current research) and have the contents be searchable./A | |
| An OCR tool | good and easy to use open source ocr tool would be great; it's easy to scrape html tables into data frames for further analysis, but if the same table is in a pdf file? Not so, I wish | |
| A parser for pdfs | there was a tool to parse them the same easy way/Pdf parser for official forms would have been very useful | |
| A tool to search pdf documents | Searching PDFs and Facebook pages is challenging | |
| A document search tool | Also a bulk public document searching tool (with maybe multiple regions you can click on a global map). | |
| | | |
| Companies/properties/tender calls | | |
| Companies/properties/tender calls | Not that 1 got stuck per se, but I lost a lot of time. When investigating a network of comparies in the US. I had to check roomany gotstrikes for almost even other. There are many websites that claim to have consolidated company. | |
| Companies/properties/tender calls | company registries for almost every state. There are many websites that claim to have consolidated company information, but I have yet to find a tool that allows me to search up to date company registration information per country | |
| Companies/properties/tender calls | company rigistrises for almost every state. There are many websites that claim to have consolidated company information, but have yet to find a tool that allows me to esserch up-to-date company registration information per country (and that is reliable). Many countries have separated database per county or state (US, Brazil, Switzerland, etc) and it is time consuming to search each of the websites accessing the local database. | |

| | Would Bellingcat be interested in developing a more responsive version of the map at liveuamap.com? I'm thinking of a map resource that could collate user submissions to provide actionable intelligence information for operators on the front | |
|---|---|--|
| | lines. I'm imagining a regular citizen behind the front lines that could provide useful information with the aid of a cellphone app - for example, placing a pin on the app to identify the location of enemy resources or to provide bomb damage | |
| | assessments. To go a step further, team members could be explicitly tasked to collect and organize information on the map to provide actionable intelligence for front line forces. In the same way that the Institute for the Study of War (ISW) was created for the US military to provide themselves an independent analysis of ongoing military operations (an | |
| | "objective" analysis from outside of the military chain of command looking at immediate tactical and strategic issues using open source information), I imagine the OSINT community could develop an open source intel tool that provides a parallel | |
| | spen source inducts, it may be considered and the spen source and the source and the portice a parallel stream of actionable intelligence for the teams on the first lines and for the decision makers up the command chain. Even better, develop a team that can manage the work of the open source community to focus it specifically on the needs | |
| An improved version of the liveuamap that accepts user submissions | of the war effort. | |
| Languages | | |
| A tool to analyze Arabic speech | | |
| A tool to translate comments in code | Something to translate comments in code as I read it instead of distracting myself having to bring up an external translator. | |
| Online databases for terms in different languages | Online databases of terms to search in native language using native language tools/search engines. Better language key word library for russian and Chinese languages and dialects. | |
| A language keyword libaray for Russian or Chinese languages | better language key word itolary for russian and chinese languages and dialects. | |
| Language recognition tool for videos A tool to translate into the Chinese language | Full and meaningful translation of papers / docs in Chinese language (espec. PDFs !!) | |
| Better translation software for less common languages | Better Translation software for resource limited languages (such as Pashto or Dari), or non-latin alphabets. I would love to be able to search for things in multiple languages simultaneously, I'm constantly moving between a | |
| A tool that allows to search in multiple languages simultaneously | good. | |
| Sneech to text | 9000. | |
| A safe speech to text tool | I need a good, SAFE, inexpensive tool I can rely on that will convert speech to text. | |
| Organize information | | |
| | I definitely feel like software (and my own technical abilities) are a limiting factor. As described above, what I really want is a good all result to a capable of insection and stories data points in a variety of formats to each data collection. | |
| | a good all round tool capable of ingesting and storing data points in a variety of formats to enable data collection, processing and production of intelligence. It's important to me that this be able to deal with geospatial and temporal data, and given the global nature of OSINT data, it needs to handle datetime coding across multiple time zones/Most of the | |
| | time I can't find a tool that would be a good alternative to a corkboard, which is to say a visual but effective way of connecting/organizing information/notes/When there are multiple investigations on the go it is frustrating to not have a | |
| | compartmentalised system that can be used to store relevant information/data i.e. notes, statements, photographs etc./ I wanted a tool where I could upload all my interview data, diary data, reports, and journal articles, and be able to search | |
| | through them, annotate, and link other files more easily. A combination between elements from Miro, MAXQDA, Trello, and Padlet would be great./Case management is always a tough one. My colleagues and I often resort to simple word | |
| | documents to maintain a central knowledge base. It can be beneficial, especially from a chronological aspect, but it's also cumbersome and I feel like there has to be a better way. I think the LittleSis database is a good example of something | |
| | that could be useful/I need everything that will speed up the search and cataloguing of data./ I am now exploring ways that natural language processing, graph databases, and Al/ML could ease the collection and analysis of disparate | |
| | data/Perhaps tools for data curation would be more beneficial than tools for data retrieval?/The holy grail would be to have a tool to help me put the information gathered by these tools together, to complete my research./Just wanna say | |
| | that sometimes it's really hard to collect all found information in one whole picture. This is especially noticeable when you work with the interests / hobbies of a person. Directions could be quite different, but you still have to analyze it all and create a general and concise picture describing this person/situations for further decision making (possibly by other | |
| | people).Note-taking (and especially collaborative note-taking in a sensitive [not classified, just sensitive] environment) | |
| | seems not to have yet been solved. Closest I've seen is Bayanat/I have a lot of screenshots saved in my photos app. It would be very useful to be able to search the data that is in them. But it's not possible to do that as far as I know. Another challenge is going back to find something I know I once saved but can't remember exactly where or what the headline | |
| A tool to organize research findings | was. A personal, central searchable database would be very useful to me. Especially when working on a variety of projects at one time. | |
| A tool to organize research minings A tool that can collect and categorise online data from various sources and then produce a report | A spider type tool that can collect and categorise online data from various sources and then produce a report with hyperlinks and screenshots can be used for a focused drill-in. | |
| An AI tool that helps parse and categorize long texts or huge amount of images and | | |
| sound | | |
| Content analysis News media content analysis | | |
| | | |
| Data | Sometimes there are situations where I need to see aggregated data. There are websites that aggregate data for free and | |
| A tool that helps find aggregated data/data visualizations that are available online | provide interactive visualizations for the data. It would be amazing if there was a tool that could help me find where these data visualizations are on the internet. | |
| Intuitive tools to build databases | I also would like to know more or get more intuitive tools to build databases. | |
| A tool that helps process custom data sets or tables | Processing custom data sets or tables Ability to index and scan large password dump from raidforums. always need a quick and dirty way to index and link and | |
| A tool that helps index, scan and tag datasets | tag data, from browser to Maltego with multiple entities, date | |
| Other tools A tool to aggregate and sync webSDRs | a tool to aggregate and sync webSDRs and an wider mesh of them | |
| | This might be a hard one, but maybe develop a tool that can plug in to different sources of radio signals like websdr.ewi. | |
| A tool that can plug in to different sources of radio signals | utente.nl:8901 but so that i can be used by selecting a receiver in a specific country or zone on earth. I wished (& wish) there was a free online tool that could allow updated & current information pertaining to Personal | |
