

The BL4 Books

Any contributions are welcome via Reddit, u/altairnaruhodou - r/thebl4books

This guide is the work of Reddit user u/altairnaruhodou, with contributions from any volunteering members of the Bloodborne community. It is, for the most part, a gem farming spreadsheet which is specifically put together for lower level builds in need of higher damage to progress. This spreadsheet provides low-depth chalices and depth 5 FRCs chalices alike, all with a key factor in common: they are easy to farm in.

However, this isn't all there is to the BL4 Books. There are also additional sheets, which I hope will keep growing, that link to small tidbits of information - guides, trivia and tips, all focused on builds with low health or low damage output. These guides, farming aside, are the core of the project, and anyone is welcome to contribute with their posts.

This spreadsheet does NOT include save edited material. It is a dedicated spreadsheet for natural resources in the game.

I hope you will find this project useful, and benefit from these bits of knowledge. May the good blood guide your way!
