Additional Instructions:

Equine Leg Magic™ is very likely to become an integral part of your equine's health. For that reason we recommend an ELM regimen for your horse. The standard ELM regime is a MINIMUM of 10 weeks at full strength/scoops to see results. *This does not include the initial time to build up to the daily recommended amount.* Please see your custom feeding guide (above) for specific instructions for your horse.

Feed Tips:

- ELM easily "sticks" to sweet feed. *ELM will settle to the bottom of pelleted feed container

- ELM will “stick” to a variety of products such as soaked beet pulp, molasses, oils, etc
- If your equine rejects the flat mineral taste of ELM you may add the above suggestions or applesauce

Running low on ELM Tips:

- Reorder before running low in ELM! This helps prevent regression in your horse
- If low on ELM be sure to decrease the dosage slowly until you resupply and then proceed with gradual increase back to maintenance dosage.

FOAL INSTRUCTIONS & GROWING EQUINES:

- Newborns may begin ELM after 10 days.
- ELM dosage should increase proportionately to weight of horse per 100 lbs up to 3 scoops 2x/day

****Horses should be weaned from ELM. Sudden removal from your daily regime could lead to great discomfort. For instructions on how to wean your horse to a maintenance level please visit our website.***

***** ELM Product may vary in color from batch to batch. This does not affect the quality or effectiveness.***
